**Subject:** Wolverine PFAS Response  
Latchana - Wolverine-110917.pdf

Chris, in response to last week's conference call I am providing the attached letter from DEQ to Wolverine Worldwide. Michigan DEQ is also in the process of establishing a response structure reporting directly to the director on statewide PFAS issues. While still very fluid, we anticipate the structure will consist of an executive office lead with an Operations Manager reporting directly. That operations manager will have 7 team leads covering key areas of the state affected by PFAS issues including Grand Rapids responding to the Wolverine Worldwide contamination. These 7 team leads will have a team of experts helping them respond to any issues in their area. The DWMAD has been tapped to fill 2 of these expert positions. We anticipate the structure being finalized in the next 2 weeks.

We appreciate EPA Region 5's assistance and offer of help in this issue.

V/R

Eric
